

# Your Body KNOWS!

In today's world, there is a doctor or specialist for every part of your body. **The best doctor ever created works to keep us healthy and alive 24 hours a day. It is inside of us and it came from GOD called innate intelligence.** Regardless of your religious belief, we would all agree that there is wisdom inside of us. This wisdom within us...

- Draws the blueprint and organizes every living organ for your body
- Regulates, directs and controls the body all of the time
- Knows when something is wrong inside of you and how to fix it.
- Rebuilds all tissues, organs, muscles and bones
- Tells you when to sneeze, when to blow your nose, when to go bathroom, when to sweat and when to shiver
- Raises the skin into a blister when the skin is burned
- Heals a broken bone or cut on the skin
- Tells you when to blink your eyes
- Grows your toe nails, fingernails, and hair
- Beats your heart and puts air into your lungs
- Regulates your body temperature
- Tells you when you are tired, thirsty or hungry
- Gets **any sick organ or part of the body well**
- **KEEPS YOU ALIVE!**

Your innate intelligence resides in your spine and travels from your brain to your body. If there is an interruption or disturbance to your body's inborn wisdom, odds are you are Subluxated.

**SUBLUXATION(s) in the upper cervical spine is a condition that occurs when the top two vertebrae in your spine misalign causing the messages from the brain to the body to become distorted due to the pressure, irritation or inflammation placed upon the Brainstem.**

Living in this state, your body is breaking down and beginning to malfunction. The longer you live in this state, the weaker the body becomes. Sickness and/or disease will eventually ensue.

**Call today for a spinal scan and evaluation to see if you have a Subluxation.  
It may just change your life!**
